

Term Test 1
Course Code: CSE 365
Course Title: Communication Engineering
Department of Computer Science and Engineering
Time: 30 min **Total Marks: 20**

- 1 a. Suppose a signal travels through a transmission medium and its power is reduced to one-half. What is the attenuation in this case 2
- b. Draw the graph of the NRZ-L scheme using the following data stream: 00110011 3
- 2 Why are protocols needed? 1+4
- A host communicates with another host using the TCP/IP protocol suite. What is the unit of data sent or received at each of the following layers?
- a. application layer b. transport layer c. network layer d. data-link layer.
- 3 Four 10Mbps input lines are multiplexed in a synchronous TDM. The unit of data is 1 bit. Find - 5
- i) The output bit duration
- ii) The output bit rate
- iii) The output frame rate
- 4 a. Define refraction and reflection. 5
- b. Name the major classes of guided media.
